Hollywood Teeth Line Lingualized Occlusion Combos™

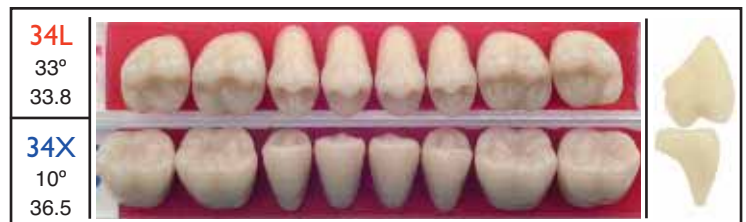

The Professional's Choice

Together with experts on lingualized occlusion techniques we have put together a selection of our posterior brands which are suitable to be used in manufacturing dentures, overdentures, and selective partials. Since the Imperial line of posterior teeth is made of a large selection of sizes we were able to create 9 different molds for lingualized occlusion. For Justi Blend we present 6 combinations, and for Viform only 2 combinations are offered. All these brands are made of a very hard plastic with a very dense cross linking formula. Justi guarantees superior wear ability for all of our posterior brands.

IMPERIAL® Lingualized Occlusion Combos™

These combinations have been selected by experts to achieve the proper lingualized tilt for more efficient mastication. Our combinations feature the popular 33° upper vs. 10° lower molds and can be easily setup and mounted whether the application is for a denture, overdenture, or partial.

Imperial teeth are offered in our standard Eterna Age Shades system from #17 to #82. Many shades offered in the Eterna system are comparable to shades in other very popular shade guide systems. See the Imperial mold chart "Shade Comparison Chart" for guidance.

HOW TO READ THE TOOTH CARDS

A - Straight line measurement of 4 upper posteriors

B - Straight line measurement of 4 lower posteriors

Mold Number	30L	
Cusps Degrees	33°	
Total Width Upper (A)	29.9	Profile of 1 st Premolar
Mold Number	30X	
Cusps Degrees	10°	
Total Width Lower (B)	33.0	

Tooth measurements are within plus or minus 5% of stated value.

Justi Teeth Products

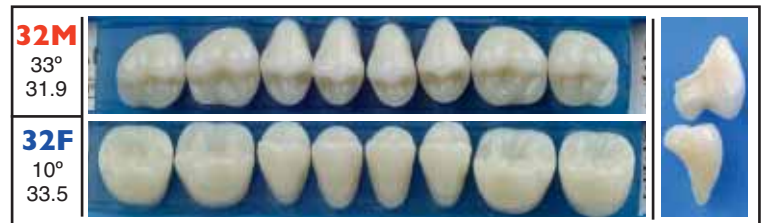

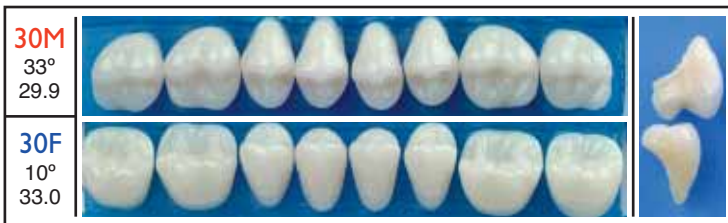

The Most Comprehensive Guarantee in the Industry

The Justi Company goes to great lengths to ensure the finest quality teeth. As a symbol of our commitment to quality, we provide the most comprehensive guarantee in the industry. Our teeth meet and exceed ANSI/ADA Specification 15, published in 1999 identical to ISO 3336, BS 3990, NF S91-213, DIN 13914, International Standards. For the certification of synthetic resin teeth to be used in dentures, partials and overdentures for implant technology. Justi teeth are stain resistant, wear and solvent resistant, color stable, fluorescent and photogenic. Justi teeth are warranted against excessive wear, breakage or discolorization for the life of your denture. This warranty does not extend to the denture base which supports the teeth nor does it cover the laboratory service fee or the dentist fee. Verification of laboratory records is required. A certificate of authenticity and warranty is included with each combination.

VIFORM® Lingualized Occlusion Combos™

The ViForm Lingualized Occlusion Combos are offered in two combinations and available in 12 popular Vita type shades. ViForm teeth were created for the professional who prefers Vita shades and Bio-

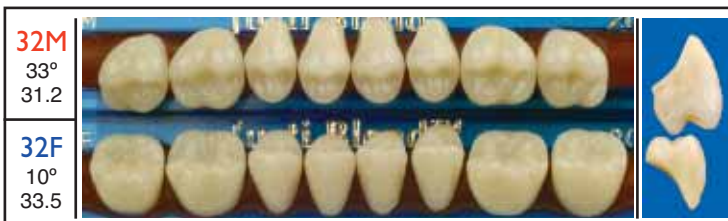

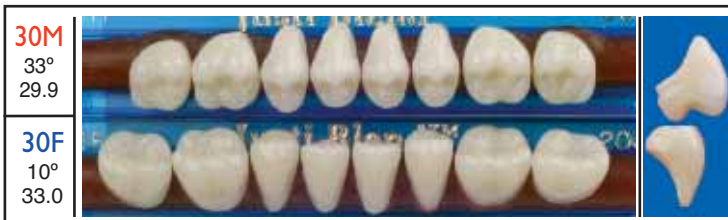

form / Portrait molds. All of our Justi Hollywood Teeth brands are crafted at American Tooth Industries's Oxnard, California factory.

JUSTI BLEND® Lingualized Occlusion Combos™

Justi Blend lingualized occlusion combos are offered in six combinations. The use of lingualized occlusion offers the prospect of greater patient comfort and chewing efficiency. We recommend that the mounting and ar-

ticulation of these combinations be done by specialists. See the Justi Blend mold chart for other molds.
